Designing a user-friendly mobile app interface for china town restaurant and catering services

Visual Design

- Create a visually appealing and user-friendly interface using the Figma UI toolkit.
- Choose colors that reflect the brand identity and create a cohesive look and feel.
- Select fonts that are legible and appropriate for the mobile app interface.
- Use icons that are intuitive and consistent with the overall design.
- Create a layout that is easy to navigate and showcases the key features of the mobile app.

Order Placement

- Streamline the process with cart management and customization options before checkout.
- Allow users to easily add, remove, and update items in their cart.
- Provide a clear summary of the items in the cart, including quantity and total price.
- Enable users to customize their orders, such as selecting toppings and adding special instructions.
- Ensure a seamless and intuitive checkout process with multiple payment options.

User Authentication Flow

- Map out the user authentication flow for the mobile app.
- Allow users to log in with their email and password.
- Enable new users to create an account by providing their email and creating a password.
- Allow users to log in using their social media accounts.
- Provide a way for users to reset their password if they forget it.

Business Owner Dashboard

- Monitor and manage your restaurant's performance.
- Track key metrics such as the number of orders, order fulfillment rate, average order value, and customer ratings.
- Efficiently manage incoming orders, update order status, and handle cancellations and refunds.
- Gain insights into your restaurant's performance with analytics.
- Integrate secure payment gateways for a seamless transaction process.

Secure Payment Integration

- Integrate secure payment gateways for a seamless transaction process.
- Enable UPI payment option and implement UPI transaction flow.
- Include cash on delivery as a payment option and provide clear instructions for COD.
- Design intuitive transaction flow and ensure secure payment handling.
